5 UNESCO sites mind the map”

Catherine Le Calvé and François Cougoule, A'Urba
Anne-Laure Moniot, Bordeaux Métropole

Bordeaux Metropole urban agency has designed an atlas of the five partner cities.

Based on European urban atlas data, it offers a comparative study of land use in each municipality, in each listed site and its buffer zone, and explores possibilities for the use of data sourced from *Open Street Map*.

It illustrates the force of comparing data.
